CF Webtools is looking for bright, talented, and motivated developers with high skill sets in ColdFusion, .NET and Mobile development (including IOS and Droid). We value developers who:

- Take ownership of a problem and find a solution.
- Participate in the community through lists, blogging, user groups etc.
- Have a high skill set and a professional learning ethic.
- Know how to communicate technology concepts across disciplines.
- Respects and honors our customers.
- Have a great sense of humor.
- Love being a part of a "family" of developers who work together without a lot of drama.

For more info on what it takes to be a CFWT consultant check out my post on You Might be a Muse All-Star.

Our positions are full-time remote telecommute. On rare occasions they might require some travel. We pay a competitive salary and benefits. CF Webtools maintains sites on virtually all ColdFusion and Database platforms. Our work is challenging, enervating, sometimes hair-pulling, but never boring. Our development group is lively, talented and a true mentoring community (and growing more so daily). If that sounds like a place you would like to work (and you meet our high skill-set standards) send your resume to jobs@cfwebtools.com - or contact the Muse directly if you like. Tweet me @cfwebtools or use the "Ask a Muse" link on this blog (I'm easy to find). You can also call 402 408 3733 and ask for Mark or Jason - we'll be thrilled to speak with you about our opportunity. The official job posting may be found on our corporate site at the Job Openings page.

Please note - while I'm getting better, I'm not am often pulled in many directions. If you feel like I have "dropped the ball" when you sent me a resume in the past - you are probably right. Please don't hesitate to contact me again. I'll make sure that Jason and Melissa (who handle the details) don't let you fall through the cracks this time.
